

Tomislav Galjanic

Tomislav Galjanic has over sixteen years of experience in energy and electric utilities. His areas of expertise include energy planning and procurement, energy markets participation, and energy finance and risk management. In addition, Tomislav has experience in the banking sector with a focus on risk management.

Tomislav has previously held senior management and project management positions and led analytical and planning teams in the Power Supply business unit of the Southern California Edison (SCE) company in Los Angeles, California. At Erste Bank in Zagreb, Croatia, he was in charge of the market and operational risk group in the Risk Management Division.

Tomislav is a graduate of Stanford University with a Master of Science degree in Engineering-Economic Systems and Operations Research and of the University of Alabama with a Bachelor of Science degree in Computer Science.

In energy planning and procurement, Tomislav led valuation of Power Purchase Agreements (PPAs), capacity, energy and ancillary services, price and volatility forecasting, demand and renewable generation forecasting, resource optimisation, and he has provided support for energy and emissions trading.

In energy markets, Tomislav participated in initiatives to develop market products for distributed energy resources (DERs) and led integration of over 1,100 MW of demand response (DR) resources in the California Independent System Operator (CAISO) markets.

In energy finance and risk management, Tomislav followed construction cost trends for building new power plants, developed fuel and purchase power forecasts, and estimated and monitored portfolio risk. In the banking sector, he was in charge of tracking VaR's, validating daily transactions, approving new products, and implementing operational risk monitoring programs.

Tomislav is an experienced leader of cross-functional teams for IT system implementation. He has managed several projects that involved procurement and/or in-house development and implementation of multi-million dollar systems for forecasting and operational activities.

Tomislav speaks English and Croatian at a native level and Italian and Spanish at a limited working proficiency level.
